Sterilizer Arnold's Special for Instruments:—Oval in	
Shape; size of Chamber, 14 ins. long, 9½ ins. wide, 6	
ins. deep, with two Racks for instruments. Heavy tin,	
copper bottom, \$5.00; all copper, \$12.00.	
237 Sterilizing Oven:—Made for Sterilizing Instruments,	
Bandages, etc., in Dry Heat. It has been our aim	
to construct an oven to produce the most uniform	
heat inside of the oven. They are made of the best	
Russian iron, with double walls, through which the	
heat circulates, having a register on the top. In	
order to secure a perfectly even circulation of the	
heat all around there are connecting openings between	

Fig.

the double doors. The heat is furnished by a powerful Bunsen Burner, which is placed below the tunnel-shaped opening in the center of the bottom of Oven, circulating through the double walls and escaping through the register in the center of the top. In order to secure the proper heat necessary for Sterilization, and to prevent the overheating of the instruments, etc., which would spoil them, there is inserted into the opening on the one side in the top of the Oven, and held by a cork, as shown in the cut, an improved Gas Regulator. These Ovens are made in four sizes:

Inside measure 9x 9x12	{ incl. Bunsen Burner, Gas Regulator, Thermomet. }	{	\$16 00
" " 9x 9x15			20 00

Fig.

- 1 Bottle, 4 ozs., for Catgut Ligature, in corrugated tin box, with glass reels.
- 1 Hard rubber, Iodoform Spinkler.
- 1 Tin Can, with $\frac{1}{2}$ lb of Ether.
- 1 Glass Jar, with rubber cork and metal screw top, for Rubber Drainage Tubing, with 5 parts carbolic solution to 100 parts water.
- 1 Glass Jar, for Compressed Carbolized Sponges.
- 1 Scissors, for cutting Gauze.
- 1 Tongue seizing forceps
- 1 Razor. 1 Teaspoon. 1 Piece of Wax.
- 1 Ether Inhaler and 1 Esmarch's Chloroform Mask, both enclosed in rubber cloth bag.
- 1 Fountain Syringe, with 3 glass points and rubber tubing; also in rubber cloth bag.
- 1 Hypodermic Syringe in metal case.
- 1 Stiff Nail brush, solid wood back.
- 1 Dozen large and small Safety Pins.
- 1 White Linen Pouch, for the reception of instruments.
- 1 Nest 6 Tin cups.
- 1 Nest 3 large Square Tin Basins.

The Valise has loops inside for holding the bottles and the various articles; an inside pocket for small articles and an outside pocket for dressings. The Valise is placed in the nest of tin basins, and is fastened to the same by two leather straps. Size of valise, 18 ins. long by 8 $\frac{1}{2}$ ins. wide. Price; complete.....\$45 00

- 310 Operating Aseptic Hand Bag, Buchanan's. The Anti-septic Satchel here shown is one which has been in use in general practice for several years, and we have no hesitation in saying that it contains all the appliances necessary for the antiseptic treatment of a capital, or accidental operation. It has also the advantages of lightness and portability. It contains the following: 2 one-ounce jars Carbolic Acid (cry-

Fig.

stals); 1 bottle Corrosive Sublimate Tablets; 5 yards Sublimated Gauze in tin case; 6 Roller Bandages (ass.) 1 Patented Package assorted Catgut on reels; 1 Patented Package assorted Silk on reels; 1 Tin Flask for Anæsthetics; 6 assorted Rubber Drainage Tubes in vial; 1 oz. Iodoform in Hard Rubber Sprinkler; 1 Razor; 1 Nail Brush; 1 Cake Soap in case; 1 Imp. Hard Rubber Irrigating Apparatus; 1 Roll 1-inch Rubber Plaster (10 yards); 2 ounces Absorbent Cotton, all in Leather Bag (16-inch) Frame. Price complete..\$12 00

Minor Operating Cases.

Minor Operating case No. 1 contains Scalpel large, Scalpel medium, Scalpel small, Sharp point curved Bistoury, Blunt point curved Bistoury, Finger knife, Hernia knife, Tenatome, Tenaculum, Artery and Needle Forceps, Aneurism Needle and Director, Straight Scissors, Dressing Forceps, Plastic Pins, Needles, Silk, in mahogany case polished inside and outside; metal handled Instruments Price.....\$12 50

Minor Operating case No. 2 contains Scalpel large, Scalpel medium, Scalpel small, Bistoury curved sharp point, Bistoury curved blunt point, Finger Knife, Hernia Knife, Tenatome, Tenaculum, Thumb Forceps, Slide catch Artery Forceps and Needle Holder, Polypus Dressing Forceps Straight Scissors, Aneurism Needle and Director, Caustic Holder, Male and Female catheter, Silver Probes one pair, Plastic Pins. Needles, Silk, Catgut, metal handle instruments, case polished in and outside price.....\$15 00

Minor Operating case No. 3 Gross's contains Scalpel large, Scalpel medium, Finger Knife, Hernia Knife, Bistoury sharp point curved, Bistoury blunt point curved, Tenatome sharp pointed, Aneurism Needle, Finger Saw, Elevator and Raspatory, one pair Retracting

Throat Instruments.

650	Air Receiver complete consisting of an 18 inch seamless copper nickel plated receiver tested to 120 lbs., air gauge, pump, silk covered tubing, cut off with bayonet catches, and 3 glass spray tubes	\$32 00
	With 3 hard rubber, or 3 metal spray tubes	34 00
651	Air Receiver complete with nickle plated seamless Copper Receiver, Air gauge, pump, silk covered tubing, cut off with bayonet catches, 3 hard rubber Spray tubes on handsome finished Oak Table	\$36 00
652	Air Receiver with Lever pump fastened on a handsome finished Iron base with Air gauge, silk covered tubing, cut off with bayonet catches fastened on 3 glass Sass' Spray tubes, all parts of Pump and Receiver highly finished and nickle plated	\$70 00
	Air pump, (see fig. 650) with T. handle all parts nickle plated	\$7 50
655	Air Pump extra long finely finished on Iron Base	\$10 00
	This is the best T. pump made.	
657	Air Pump O'Learys Lever action	\$11 00
658	Air Pump, Lever action, finely finished, pumps to 150 bls. never gets out of order	\$21 00

660 Air Pump, Double Oscillating with gauge designed for exhausting as well as compressing air for atomizing purposes, and for compressing oxygen.

The construction of the pump is such that a pressure of 125 lbs. to the square inch can be obtained with little effort. The fly-wheel, frame part, and base are nicely japanned in black and ornamented in bronze, and all bright parts highly finished and nickle plated—making this pump especially adapted for the office.....\$30 00

Without gauge27 00

Air Tank only as Fig. 650 with gauge18 00

663 Air Tank, made of steel, tinned in and outside, or Japanned. With gauge registering from one to one hundred lbs. and latest improved high-pressure valves warranted not to leak. Also, provided with couplings for attaching rubber tubing. Size, 10 inches by 32 inches.....\$20 00

L. & L. Automatic Hydraulic Air Compressor.

This device obviates the necessity of any of the larger pumps being worked by manual power. The difference in the price of each is but slight, and the Hydraulic Compressor accomplishes more automatically than the ordinary Hand Pump will with manual labor, it will give the same amount of pressure as the water system with which it is connected, and should be used in places where the water pressure is sufficiently high to produce the desired air pressure\$25 00

670 Vaporizer Champion\$4 00

672 Vaporizer Geyser, for vaporizing medicated Albolene, used with an Air Receiver.....\$12 00

	Adjustable Gas Stand, extreme height of small size 18 inches.....	6 00

For the greater convenience of those who use our improved Laryngoscope, we have constructed an Adjustable Gas Stand, in two sizes. The smaller size is for the desk or table, the larger to be placed on the floor, near the couch of the patient.

They are very strongly made, have a heavy iron base to increase steadiness and have a generally neat appearance. Iron supporting the burner is very readily raised or lowered after slightly loosening the centre screw; by tightening the same the burner support is held firmly in position and the joint is made gas-tight.

We are now making several new Electrical Instruments among others a **Head Light** to be used (with Storage or Caution Battery) in place of the ordinary Head Mirror, for examining the Throat, Nose, Vagina, Urethra etc.

We also furnish complete **Electrical Outfits** for Throat and Nose Work.

Descriptive Circular on Application.

Miscellaneous Instruments.

1350	Aspirator small, with Trocar, Aspirating Needle, 2 hypodermic needles, and Stop cock in Morocco Case	2 25
1351	Aspirator L. & L.	

This Aspirator possesses advantages over any other in the market, and its low price places it within the reach of every practitioner. The pump has two automatic metal valves, which enables the operator to quickly change it from an exhaust to a force pump, thus converting it into an injector. The valves are easily cleaned and not injured by coming in contact with liquids, and as the fluid passes only through the needle, long pipe, end stop-cock, the instrument is easily cleaned. It is nickle plated and put up in a neat velvet lined case with 3 Needles, 1 Trocar and 16 oz Bottle,

1364

1364 Hypodermic Syringe, Pencil Case pattern being the only Syringe that can be rendered perfectly Aseptic.

Fig.

Fig. A small box to hold Tablets. B needle which is carried in the piston rod at C.

By putting a few drops of carbolized oil in the piston rod it will always keep the packing oiled as well as the needle Aseptic,

Price	2 00
With 2 tablet boxes A	2 25
“ 3 “ “ A	2 50

All our Syringes are made so that a pellet can be dropped in the syringe.

1366 Buggy Case, size, $5\frac{3}{4} \times 6\frac{3}{4} \times 2$ inches.

Contains 24-2 $\frac{1}{2}$ drachm, 7-6 drachm. and 5-3 drachm wide mouthed corked vials. Also a box for hypodermic syringe. Best black seal leather 8 50

Doctors often complain that the leather loops holding the bottles in medicine cases are a source of trouble and inconvenience. The bottles are often too loose or too tight because these loops are either too large or small, and besides this, the face of the bottle is so covered that little room is left for the label.

But case No. 1366 is one to which none of these objections can be made. A Physician's *multum in parvo* case, very compact and substantial, and of attractive appearance.

The vials are held in by nickel tongues projecting over the base of the vials, which are thus secure but can be taken out without the slightest trouble. Physicians using tablets, pills or pavules will find this case particularly handy, as the bottles have mouths of good width.

1373 Buggy Case, size $10 \times 7 \times 4\frac{3}{4}$ inches.

Containing 6-1 $\frac{1}{2}$ oz., glass stoppered, 9-1 oz., and 12-4 drachm corked vials. In the top is a box with lid, size, $9 \times 3\frac{3}{8} \times 1$, with instrument loops, space large enough for a small sized stethoscope. The case closes with a spring catch, and has a lock and key. It is most substantially made, and will bear much rough usage10 50

NOTE.—In place of the 12-4 drachm vials, we can furnish 24-2 drachm vials, or 6-4 drachm and 12-2 drachm. Please specify the number desired.

Fig.

1375 Buggy Case, Size, 10 inches long, $6\frac{1}{2}$ inches high, $4\frac{3}{4}$ inches thick.

Black morocco, contains 20-1 oz., and 13-6 drachm corked vials. Its corners and edges are protected with nickel trimmings, and as its leather is the best it will, with proper care, last for many years. It contains two covered boxes, each $4\frac{1}{2} \times 5\frac{1}{2}$ inches and $1\frac{1}{4}$ inches deep, in which may be carried pocket instrument case or sundry other articles. Spring lock with key....11 00

NOTE.—This case can also be furnished to contain 7-6 drachm and 12-2 drachm vials, in place of the 13-6 drachm.

1376 Buggy Case, size, 10x7x6 inches.

Satchel Case, 10-inch frame; contains 18 1 oz., 11-6 drachm and 11-4 drachm corked vials, ample loops for instruments, box for sundries and a neat plush-lined case for hypodermic syringe11 75

We think this is the most convenient satchel case in the market. All of the pieces holding the bottles are removable, transforming it into a traveling or instrument satchel.

SPECIAL LIST OF BUGGY, HAND AND POCKET Vial Cases sent on application.

Dissecting Cases.

Dissecting Case No. 1, Contains: 1 Scalpel, 1 Cartilage Knife, 1 pair Forceps, 1 Tenaculum, 1 pair Scissors, 1 Blow Pipe, Hooks and Chain in mahogany case 1 45

Height less railing 40 inches.

Instrument Cabinets, Allison's and the Perfection
Circular on Application.

1385 Instruments Cabinet for Dentist.

We desire to call attention to our new style of Dentist Cabinet. It comprises four small and three large drawers, a revolving compartment with four movable shelves which can be turned outward (see second shelf with cups), thus bringing the instruments conveniently within reach of operator,

Lower part of Cabinet is large enough to hold Basin, Towels, etc. By closing and locking revolving compartment, the four opposite drawers are securely fastened. Altogether a very desirable piece of Furniture for office use-

We make them in Antique Oak and Walnut. Mountings are nickel plated Boxwood casters.

Height of Cabinet to railing, 63 inches; width,

28 inches; depth, 16 inches25 00

1449 Urine Test Stand, Luchesi No. 2:

The case is made of hard wood, finely polished, and is constructed on a new principle which possesses many advantages. The upper part, which forms the test tube rack when in use, can be closed down and fastened; the hollow slats holding the funnels slide into the case; the drawer can be returned to its socket, thus forming a neat, compact box that guards its contents from breakage and protects them from dust, light and air. It contains 8 Reagent Bottles, 2 Glass Funnels, Alcohol Lamp, 2 Beakers, Porcelain Evaporating Dish, 2 small Glass Evaporating Dishes, 14 Test Tubes, assorted sizes, Test Tube Holder, Urinometer, Graduated Pipette and Litmus Paper. Two of the reagent bottles contain the two solutions now used in making Fehling's Test; one a solution of Sodio Potassic Tartrate, the other a solution of Cupric Sulphate, both so adjusted that, with the directions that accompany the case, a physician may easily make both a qualitative and quantitative analyses for Glucose, thus enabling the practitioner not only to detect sugar

1558 Dr. L. A. Sayre's Apparatus for suspending Patients while applying the Plaster of Paris Jacket, etc, 5 00

We are prepared to furnish either of the above Jackets but would recommend either the Wood

Fig.

or Paper Jacket, the latter supersedes anything heretofore contrived in lightness, durability and imperviousness to moisture. In order to make it we must have a Plaster of Paris Jacket, made as well as possible, as the Paper Jacket cannot be made to fit any better than the former.

Directions for making Plaster Cast on application.

Knee Extension, see Splints.

1560 Knee Joint Apparatus Strohmayer's....16 00 to 20 00

1562 Knock Knee Brace20 00 to 30 00

Measurements required same as Doyle's Rotator send lace shoes.

Partial or Entire Paralysis Apparatus for one Leg

“ “ “ “ plain12 00 to 16 00

“ “ “ “ with stop joints 16 00 to 20 00

“ “ “ “ for both Legs. 22 00 to 35 00

MEASUREMENTS REQUIRED.

1. Send strong shoes to lace completely down to the toes, with low heels.
2. Circumference of Body between crest of Ilium and Trochanter Major.
3. Circumference of Thigh one-quarter below Perineum.
4. Circumference of Thigh one-quarter above Knee Joint.
5. Circumference of Leg at Knee Joint.
6. Circumference of Garter.
7. Circumference of Ankle.
8. Distance from Sole to Ankle.
9. Distance from Sole to Knee Joint.
10. Distance from Sole to Trochanter Major.
11. Distance from Sole to crest of Ilium.
12. Right, Left or both Legs. Entire or partly.

Splint for Ankle Extension Phelp's6 00 to 10 00

Splint for Ankle Extension Sayre's....12 00 to 16 00

MEASUREMENTS REQUIRED.

1. Trace the outlines of the Sole of the Foot on a piece of paper.

Fig.

2. Right or Left Ankle.
3. Length from Sole of Foot to Garter.
4. Circumference at Garter.
5. Circumference of Ankle Joint.

Splint for Hip Extension, Judson's, plain.....	17 00
Splint for Hip Extension Judson's with key and ratchet	24 00

1570 Splint for Hip Extension, Phelps

This Splint is designed to absolutely immobilize the joint and relieve intra-articular pressure. Fixation and rest allow the processes of repair to take place uninterrupted by the trauma of motion. Traction relieves intra-articular pressure and controls muscular spasm.

Hip Splint, plain, not polished	16 00
Same, polished and nickel-plated	22 00
Steel Elevation for well leg, according to finish price,	3 00 to 6 00
Cork Elevation for well leg.....	6 00
Wood " " "	1 50

MEASUREMENTS REQUIRED.

1. Sex, age and weight of patient.
2. Right or left.
3. Circumference of Chest under Axilla.
4. Circumference of Waist.
5. Circumference between Iliac Crest and Trochanter Major.
6. Circumference of Thigh at Perineum.
7. Circumference of Leg, middle of Thigh.
8. Circumference at Knee.
9. Circumference of Leg between Ankle and Knee Joints.
10. Distance between Axilla and Iliac Crests.
11. Distance between Iliac Crests and Trochanter Major.
12. Distance between Trochanter Major and middle of Thigh.
13. Distance between Perineum and middle of Knee Joint.

Fig.

14. Distance between Perineum and Sole of foot.

15. Send lace shoe for the well foot.

Splint for Hip Extension, Sayre's, short 11 00 to 13 00

1572 " " " " " long..

With Plain Joint16 00

With Platform Joint and Abducting Screw.....23 00

With above and Rotation.....27 00

Any of above with Spring Box, add 3 50

Any of above with Automatic Lock Knee Joint,
add 6 00

MEASUREMENTS REQUIRED.

1. Circumference of Body between crest of Ilium
and Trochanter Major.

2. Length from the above point to Sole.

3. Length from the above point to Knee.

4. Right or Left.

Splint for Hip Extension Taylor's.....16 00

Splint for Knee, Hutchinsons10 00

For making this we require a wrapping of the
limb, of Plaster of Paris Bandages, from which
we make a facsimile in Wood or Paper.

Splint for Knee Extension Phelps plain \$7.00 to 10 00

Splint for Knee Extension Phelps Nickle plated
\$10.00 to 13 00

1575 Splint for Knee Extension Sayres\$12.00 to 16 00

MEASUREMENTS REQUIRED.

1) Circumference of Thigh.

2) " " Knee.

3) " " Leg below calf.

4) Length from Knee to below calf.

5) " " Knee to Thigh.

6) Right or Left,

1578 Apparatus for Lateral Curvature of the Spine

\$15.00 to 20 00

Apparatus for Lateral curvature of the Spine.

With elastic Extension Crutches. Price 25.00 to 30 00

Fig.

One of the main features of this apparatus is the elastic body band, exercising tension against the curvature,

MEASUREMENTS, REQUIRED,

- 1) Sex of patient.
- 2) Place a thin and flexible strip of lead along the Spine moulding it exactly to the Spine from the seventh Cervical Vertebra to the middle of the Sacrum. With this pattern trace the shape of the Spine on a sheet of paper, marking the points opposite the upper and lower borders of the Scapulae and the crest of Ilium, also the effected parts of the Spine.
- 3) Length from crest of Ilium to Axilla-right side.
- 4) Length from crest of Ilium to Axilla-left side.
- 5) Distance from the center of one Scapulae to the centre of other.
- 6) Circumference of Body under the Axillae.
- 7) Circumference of Body between the crest of Ilium and Trochanter Major.
- 8) Mention whether the convexity of the curve is to the right or to the left.
- 9) Diameter of the Back from Axilla to Axilla.

Spine Brace Taylors.

Dr. Chas. F. Taylor's Apparatus for Pott's Disease, or posterior Curvature of the Spine.

Price.....\$15.00 to 25 00

Spine Brace Washburns for same purpose

\$12.00 to 16 00

Talipes Equinus Apparatus.

Stirrup over toes connected by elastic strap to garter band, Price\$3.00 to 8 00

For measurements required see Ankle Braces.

Talipes Calcaneus Apparatus.

Stirrup and heel of shoe connected by adjustable elastic band to back of garter band.

Price\$5.00 to 8 00

Fig.

Torticollis Apparatus, Davis'.

When ordering this apparatus the shape of the steel head bar should be ascertained, by giving its desired shape to a piece of pliable wire and making a tracing of the latter on a piece of paper.

Price.....16 00 to 25 00

MEASUREMENTS REQUIRED.

1. Circumference of the Head, passing under the Chin and behind the Ears to the top of the Head.
2. Distance between the Axillae.
3. Distance around the Shoulder, avoiding the Armpits.
4. Circumference of Body between the crest of Ilium and Trochanter Major.
5. Distance from the Navel to the top cavity of the Sternum.

Sayre's Wire Cuirass, according to size 16.00 to 30 00

Same, with Jury Mastadd 3 00

MEASUREMENTS REQUIRED.

Place patient undressed upon a sheet of paper and with a pencil carefully trace entire outline.

1. Sex of patient.
2. Distance between base of Neck from one side to the other, passing over the Ears and Head.
3. Circumference of Head at Eyes.
4. Circumference of Neck.
5. Length from top of Skull to the Vertebra prominens.
6. Circumference of Body under Axillae.
7. Circumference of Body at the waist.
8. Circumference of Body between crest of Ilium and Trochanter Major.
9. Circumference of Body at Nates.
10. Length from Axillae to Perineum (back),
11. Length from Vertebra Prominens to Perineum.
12. Length from Perineum to Sole of Foot inside
13. Length from crest of Ilium to Sole
14. Circumference of Thigh at Perineum.
15. Circumference of Thigh midway between Perineum and Knee Joint.
16. Circumference of Calf.
17. Circumference of Ankle.
